

WHY NOT USE AN EXPERT!

We live in a highly specialised society. There are experts at everything – dermatologists, IT Consultants, commercial cleaners. And everyone takes for granted using such a specialist. Even in the Taxi Industry, you have night drivers, and day drivers; Black & White, Yellow.

So why not use a specialist for your accident recoveries? There are some of you who would say they can do it themselves. What about if court becomes necessary? If you believe you are in the right, how do you go when you come up against the might of an insurer, who is ready to defend to the death?

And we firmly state that making an insurance claim is not the answer! The insurer is, after all, entitled to make a profit – if they are forever paying out on your claims, that profit will soon disappear, almost as quickly as your premium goes up! (assuming you can get cover at all)

A good expert will know the ins and outs of the industry, the vernacular and the workings of the insurers and the courts.

The cost factor is irrelevant – rather it is the cost of NOT being represented by a specialist you should be concerned about.

There are many other factors to consider also, not the least of which being letting you do what *you* specialise in – running cabs!
